

Seminar, 16 November 2017, 09.30 - 16.00, Seminar Room Hall D2, JIE Kemayoran, Jakarta

• Big Ideas • Value of Packaging • Virtuous Circle Projects

Our speakers will address on some key innovation areas:

- Differentiation • Design to value
- Product/Food Safety • Life Cycle Thinking

organized by:

member of:

in conjunction with:

Ecodesign packaging is a trending topic today within the industry. The radical promise of the circular economy is moving from our traditional take-make-dispose economy, to one that has a closed loop, where materials are continuously repurposed and engage us using innovative structural packaging strategies.

We have assembled some of industry's brightest thinkers to bring you insights on the creative design packaging and latest trends.

Take the opportunity to get valuable ideas from some industry expertise, in order to create future systems and products that reduces the high economy, social, and economical impacts.

It's a good occasion to meet with some of the industry's thought leaders and have dynamic conversations with brand owners and manufacturers as well.

Fee : Rp. 750.000 / per person (include refreshment)

Payment should be transferred to:

PT Sentra Info Pack

Bank Mandiri - Aminta Plaza Branch

Jl. TB Simatupang, Jakarta Selatan

AC No. 101-000-6015-703 Swift Code: BMRIIDJA
