**Free Book**  
**for each participant**  
 Fundamentals of Packaging Technology  
 (fourth edition - 636 pages) by Walter Soroka, CPP (price \$ 254.50)

### Greetings!

The Indonesian Packaging Federation / IPF along with the World Packaging Organization / WPO and Australian Institute of Packaging / AIP invites you to join an intensive training course in Packaging Technology being held in Jakarta, Indonesia from 10-13 March, 2015 for class discussions and factory visit.

This training course designed to strengthen participants in packaging capabilities, provides a level of insight and understanding of the packaging industry that adds real and measurable value to careers and businesses.

Packaging is a fundamental part of modern business, and the course provides you with the detailed 'overview' of packaging processes, adds value to your business and helps you to prove your worth. Through this course we will be promoting the very latest in packaging technology and practice to the many practitioners in the packaging community globally.

There will be a lot of opportunities and challenges for packaging industry with the implementation of AEC in 2015. This course will give a comprehensive picture on packaging technology and innovation as well as important packaging

strategies for the near future AEC market demand. The in-depth information, case studies and examples are based on real experiences of experts in the packaging field.

This course is valuable to all packaging related organizations such as end users or brand owners of products, packaging suppliers, research institutions, or modern trade companies whose need to capture competitive advantages towards the coming up AEC market opportunities.

This course would have seasoned international consultants from Australia - Mr. Pierre Pienaar / Australian Institute of Packaging; and some expert packaging consultant from Indonesia, and Indonesian Packaging Federation / IPF, Host.
