

a two-day Intensive Workshop: Advance in Food Packaging & Processing Technology

Date : 24-25 October 2018

Time : 09.00 - 17.00

Venue : i3L Building, Jakarta

organised by:

member of:

A two-day intensive packaging workshop will cover all about food preservation, non-thermal processes for food preservation include freezing, modified atmosphere packaging (MAP), ozone treatment, high pressure treatments, irradiation, pulsed electric fields and drying. Barrier plastic containers, pouches or bags, is now an increasing proportion of heat-treated foods production. Other methods of heating foods such as steam-into-product, high heat infusion (product-into-steam), infra red, radio frequency, microwave and ohmic heating, have been developed but are not commonly used, as they all have important drawbacks and / or are applicable only in certain foods and package configurations.

Vivek A. Chougule

Cholil Rohman

Henky Wibawa
